Super Mario Bros. Crossover is a fan-made crossover platform Flash video game launched on Newgrounds on April 27, 2010 by Exploding Rabbit. It is based mostly on the gameplay of Nintendo's Super Mario Bros. for the NES. The only major difference is the ability to control characters that debuted in other Nintendo Entertainment System games unrelated to the Mario series, plus the ability to use "skins" of levels and char-acters from other games and platforms. The latest version available (3.1.21) was released on December 27, 2013

Subject: Works as intended.
Tested on an M1 mac mini. Works flawlessly. Just make sure to download the .zip file and extract it. Also, make sure you have a way to run flash.

Subject: Great
not just a PHOTO BTW!! learn to open a zip file, and run the SWF file lol lazy this is great!

Reviewer: Ardee Santos - ★★★★★ - May 14, 2022
Subject: This suck
Because it's just a photo!
